CAREER OBJECTIVE

I'm a Full-Stack Web Developer with 2 years of experience building scalable web applications using React, Next.js, Node.js, TypeScript, and MongoDB. I focus on clean code, high performance, and smooth user experiences. I'm passionate about solving real problems with technology and contributing to collaborative teams.

SKILLS

- **Frontend:** HTML, CSS, Tailwind CSS, JavaScript, TypeScript, React, Next.js, Framer Motion, GSAP
- **Backend:** Node.js, Express, RESTful APIs, Next.js, Prisma, Drizzle, Socket.io, Stripe
- **Database:** MongoDB, MySQL, PostgreSQL, Supabase (PostgreSQL-based)
- **Tools & Platforms:** Git & GitHub, Vercel, VS Code, Postman, Figma, Chrome DevTools
- **Soft Skills:** Problem-solving, Team collaboration, Adaptability, Attention to Details, Communication
- **Currently Learning:** Docker, Kubernetes, AI Agents

PROJECTS

Shopping App

[Git Repo](#)

[Live Link](#)

Glamify – A shopping app featuring clothing items across categories for men, women, and kids. It enables secure online purchases with Stripe integration. Includes an admin dashboard for tracking stats, managing, and confirming orders.

- Shop online effortlessly with filters, search, wishlist, and cart features.
- Choose from various sizes and colors, pay securely with Stripe, track orders, or save for later.
- Admin dashboard allows easy product and category management, order viewing, and confirmations.

Tech Stack: React, TypeScript, Tailwind ShadcnUI, Next.js, MongoDB, Prisma, Stripe, Cloudinary

Gym Admin Management

[Git Repo](#)

[Live Link](#)

Fully secured Gym Admin Management System that allows admins to digitally enroll members into various membership plans, track active, pending, or expired statuses, manage renewals, filter/search members from a table, and view key stats like revenue and expenses on the dashboard.

- Add and renew members under dynamically created membership plans.
- View all members in a rich, filterable table for easy tracking and management.
- Dashboard displays key stats like total members, revenue, expenses, and more.

Tech Stack: React, TypeScript, Tailwind, ShadcnUI, Next.js, MongoDB, Prisma, Cloudinary

Twitter Clone

[Git Repo](#)

[Live Link](#)

A Twitter Clone with a similar UI/UX to Twitter, featuring core functionalities like tweeting, liking, commenting, bookmarking, user following, personalized feeds (For You & Following), and a real-time notification system.

- Tweet, like, comment, and bookmark posts with a UI/UX similar to Twitter.
- View personalized feeds with “For You” and “Following” tabs.
- Follow users and get real-time notifications for key activities.

Tech Stack: React, TypeScript, Tailwind, Next.js, PostgreSQL, Prisma, UploadThings, Tanstack Query

EDUCATION

BSc in CSE

2022 - Present

Sheikh Burhanuddin Post Graduate Collage
